How SMS Works

The system connects sales, inventory, finance, and employee activities into one centralized dashboard. Every sale automatically updates stock levels and generates real-time reports for business owners.

Business Benefits

- Real-time stock monitoring
- Faster sales operations
- Improved customer management
- Secure cloud backup
- Access from anywhere
- Professional business analytics

Design Style

The interface uses modern blue and white themes with clean layouts, interactive charts, and attractive dashboards optimized for desktop and mobile devices.
